Information för våra kunder information for our customers

Arapak and our suppliers welcomes you to DRUPA 6-19 May !

Heiber+Schröder 6A24, shows their latest tray erectors and window patchers.

Low cost window patcher, WPS 1100

This success story amongst window patchers combines good features with a low price. Now with improved feeder and servo driven cutting of the window foil.

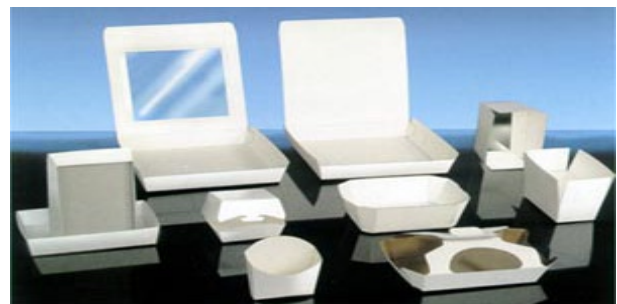

High speed window patcher, WP MASTER 1450-3

On show is a 3-lane machine patching intermittently scored windows on a "Kleenex" type box. This machine is equipped with a prefeeder loaded by a robot. You can see it run in 3 lanes (can have 4 lanes and 6 up on the drum) All operational data and settings as well as spares and service information can be reached through the operation display. Quick set up with servo motors.

Large tray erector, CE 1460

See this high capacity line with 6 lines in parallel. New feeder, servo driven forming plunge, automatic counting and batch marking. Fast set up with interchangeable modules with preset sizes.

Valco show interesting news on an ECO folder gluer in the Heidelberg's booth.

They show an improved and simplified glue pattern control with direct setting of the glue string lengths.

Valco also shows an improved ejector to better handle high speeds up to 600 m/min.

A new MCU reading head can now read also the code bars on metallized and high gloss board where the bars are detected in black/white.

Visit Valco in Hall 12 A64.

IMG Klett is a group of companies involving around ten factories world wide. The main office and demonstration center is in Remscheid near Düsseldorf. From a long tradition with machines to the corrugated industry, they are now launching some machines directed toward the needs of the carton converters.

Klett Nordic is the swedish daughter company, that in cooperation with Arapak is serving the North European customers.

Flat bed die cutter, Cobra, for eg laminated material. Size 120 x 162 cm, 4500 sheets/hr.

- Top feeder and pin stripper
- Pallett delivery or in bundles

Hand platen, Plator, with laser surveillance for highest safety.

- Stable cast iron frame and PLC control.
- Quick mounting of die cutting form
- Automatic feeder
- 74x100, 88x117, 100x128, 130x170, 140x200

Flat bed die cutter, 1050 SEF, from IMG Brausse in the IMG-Klett group.

Max 105 x 75 cm, Min 40 x 37 cm

- 7500 sheets/hr
- automatic repetitive cutting force setting
- max 300 tonnes pressure
- material 0.01 - 2 mm
- feeder with blast air for better separation of thin paper.

This die cutter is especially good for hot foil die cutting. See it in Hall 10 E57.

- 2 or 3 hot foil stations.
- 12 heating zones
- servo and computer controlled foil pulling.
- quick change over to new sizes
- servo driven foil rewinding
- Max foil width 102 cm

Foil break sensors

Foil rewinding

Automatic Laminator- Lamino

- 8500 sheet/hr
- 165 x 165 mm
- bundle turning station
- all options you will need!
- see it in the IMG-Klett factory!

Previously owned machines are never wrong.

We buy and sell all converting machines.

Over 15 years experience from within the Jagenberg group has given us an extensive supply net of price worthy machines for carton and corrugated.
