# *Advantages of automatic glue application:*

- I Cost reduction through:
  - ü higher productivity
  - ü less glue consumption
  - ü no false glueing
  - ü personnel saving
  - ü better conditions of work
- I Product security through:
  - ü accurate, reproducible glue application
  - ü strong bondings
  - ü special adhesives for sheet lined, coated, varnished and laminated materials

# ***Bickers-JMP XY - Glueing Tables ...***

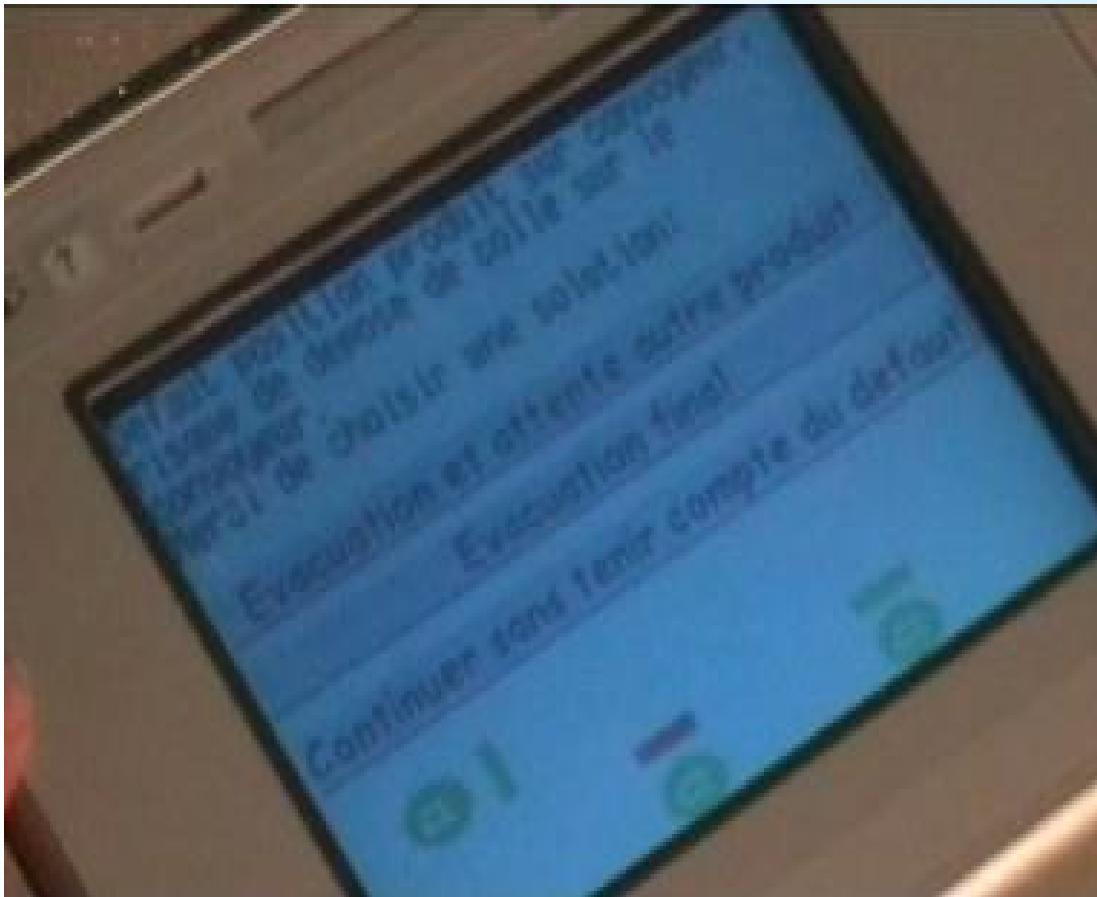

*... make working easier ...*

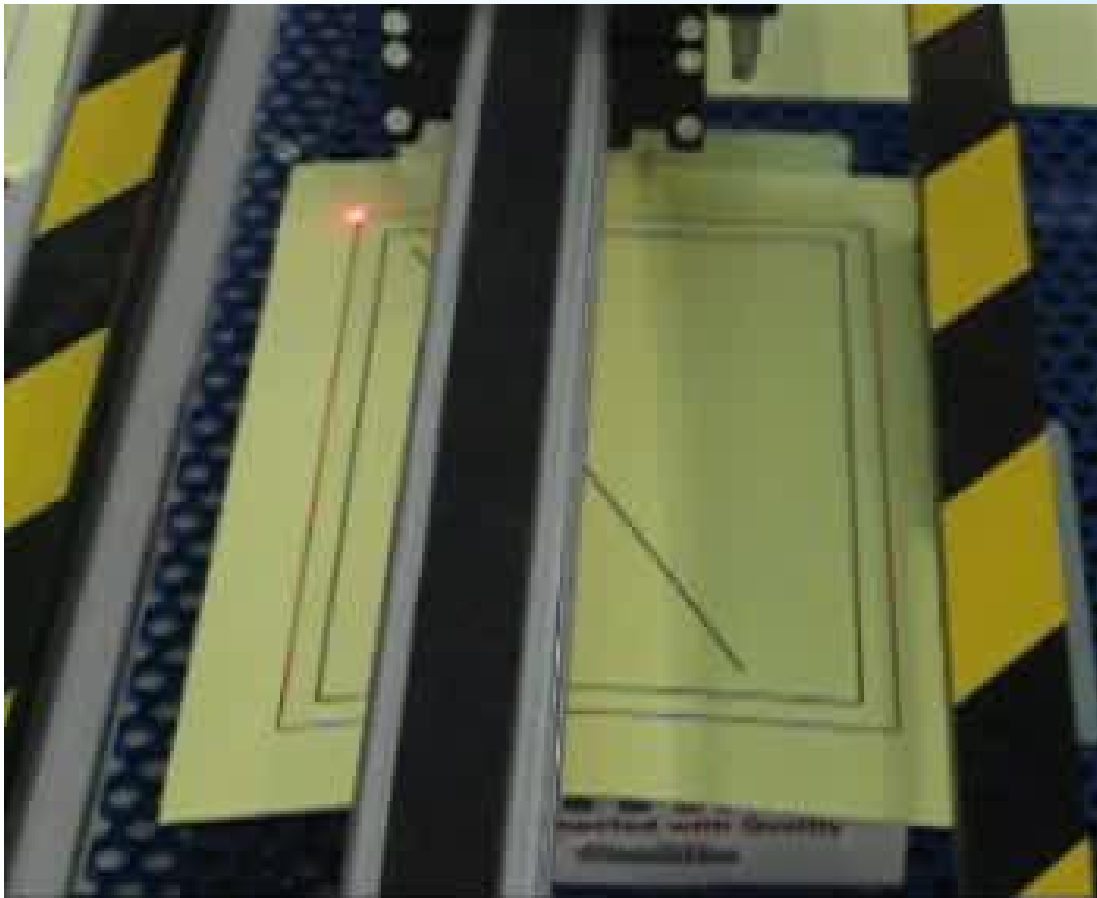

Automatic  
glue application  
in the production  
of displays.

*... are easy to use ...*

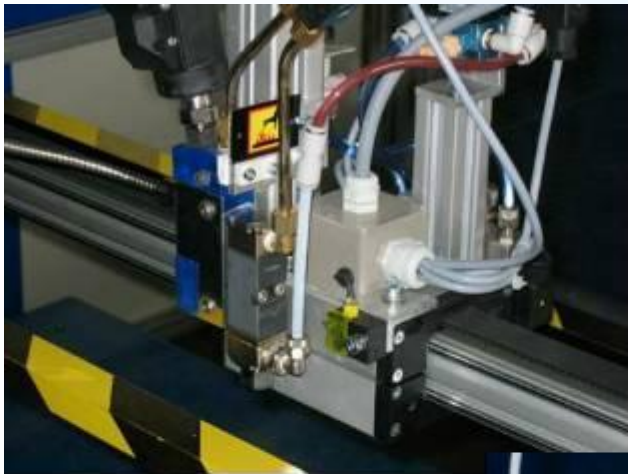

Multi lingual, self-describing control with touch screen and plain language prompting.

*... and easy to set up.*

Programming takes place by means of teach in. With the help of a laser the points of definition of the geometrical forms: line, interrupted line, point, rectangle, wave, circle and arc of circle can be positioned by joystick and confirmed.

# *Cold glue and hot melt can be applied separately or combined.*

**Four application modes  
with one machine:**

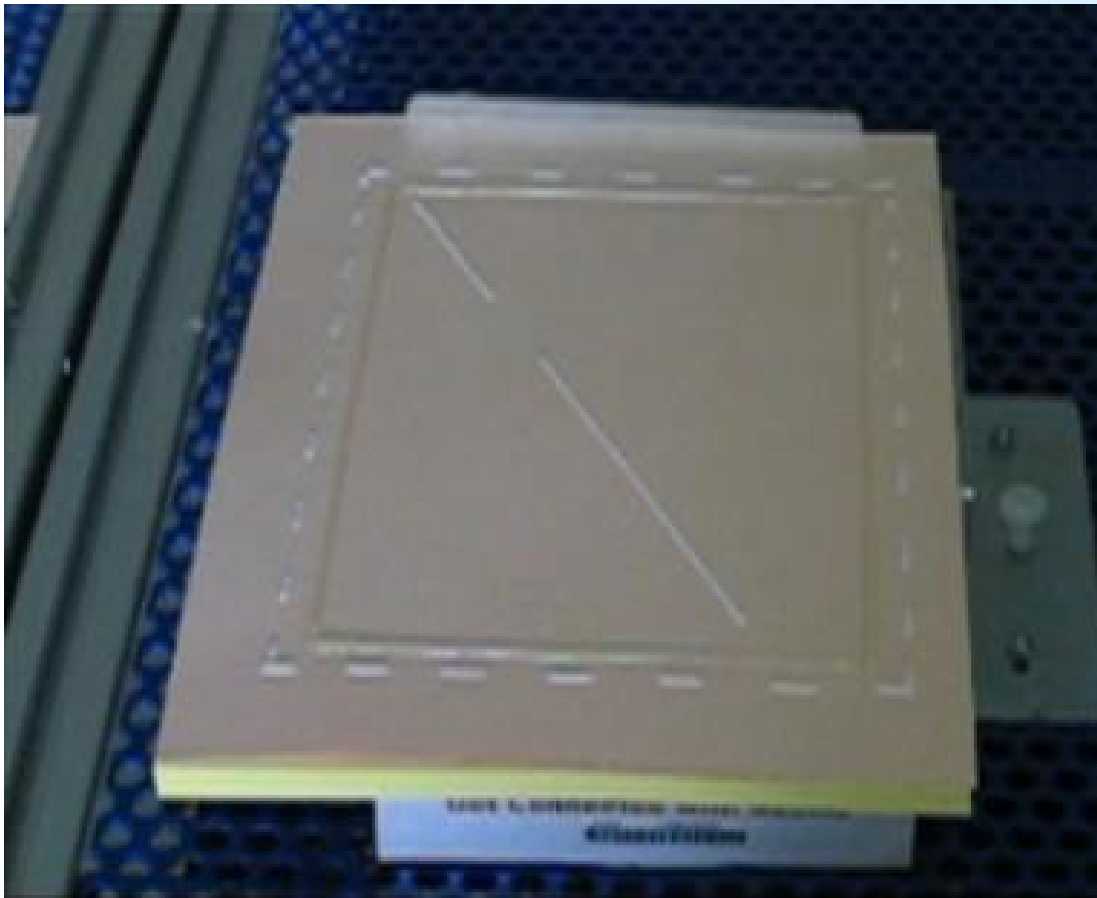

Hot melt spray module

mounted on line  
application head.

Cold glue application  
using line or spray  
application head

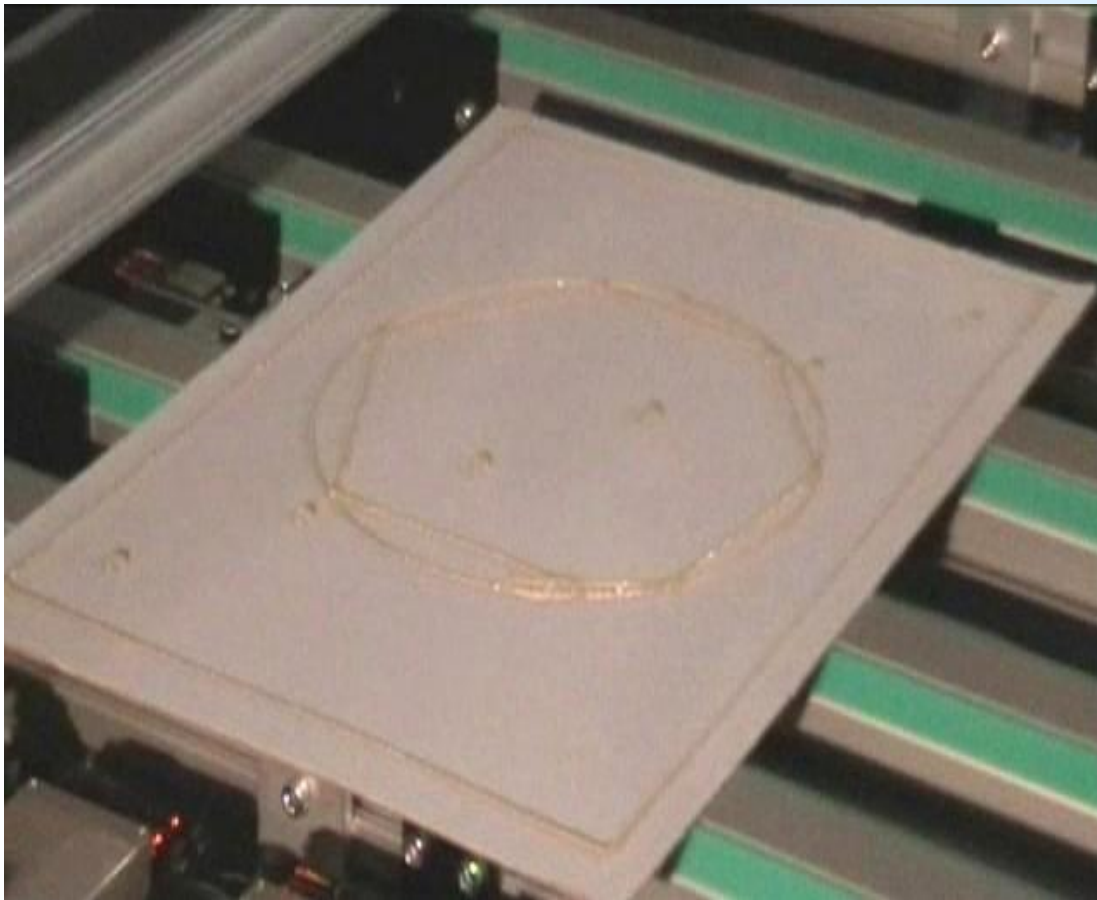

*Perfect results are quickly achieved.*

Combined cold glue  
and hot melt application.

*Difficult geometry is not a problem.*

Curved, punctiform  
and circular application  
with hot and cold glue.

*Optionally with integrated conveyor.*

**Option C.I.**

Very high increases in productivity are achieved with option C.I.: integrated conveyor belts with pick & place feeder.

# *Automatic stack height adjustment.*

## **Option C.I.**

Pick & place feeder  
with automatic  
adjustment for  
stack height and  
product position.

# *Integrated Elevating Platform: Option P1.*

## **Option P1**

For a continuous work flow with larger production volumes or with thick materials we recommend the integrated elevating platform, option P1.

*Your machine could be like this ...*

**Bickers-JMP**  
**XY-Glueing Table 15.18**

Hot melt and cold glue application controlled by touch screen with plain language prompting, integrated conveyor with automatic material supply option C.I.

# *Integrated unit for remote assistance.*

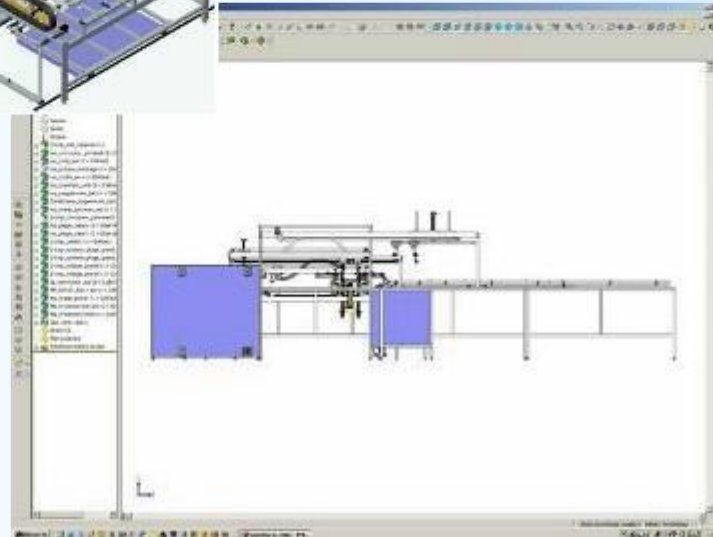

Every Bickers-JMP machine is equipped with a remote service unit, with which the machine can be accessed over a modem if necessary.

This enables e. g.:

- ü remote control of your application
- ü program updates
- ü resolving problems without necessity of being on site.

*Special solutions are natural.*

# *Automated packing of flat products.*

## *Production of P.O.S.-Displays.*

# *Bickers Klebtechnik*

*Your glueing specialist.*
