GLUEING MACHINE „Z 8“

Bench Model Working Widths 800/1000 mm

Extra Heavy Construction

An Ideal Machine for Bookbinders and Boxmakers Model „Z 8“ is suitable for working cold and hot glues. The wellknown two-roll glueing system guarantees uniform and clean glue application. Steady glue feeding is ensured by an extra large dip roll, whilst the thickness of the glue film can be dialed on a single regulator. A safety clutch is incorporated to disengage the rolls if foreign substances should enter the machine.
