

IMG-Klett GmbH in Remscheid is after its restructuring very busy. The leading group of management and contacts are the same as before.

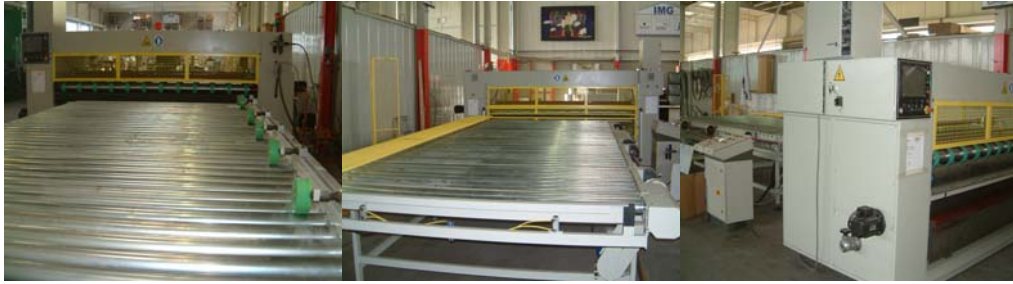

Detlef Hulverscheidt (Senior + Junior) , Manfred Pszak , Heinz Hübert , Christa Hellmann , Michaela Wöllner, Aldo Siciliano

IMG-Klett GmbH has recently sold a 6 colour off line Printer type Eurostar 1228. Equipped with Sun lead edge feeder, vacuum transport and chambered doctor blades, it is a highly competent machine for eg F-Flute or any flute printing.

The production of the "Box King" Box maker is running at full steam. Three of them are up and running in Scandinavia.

IMG-Klett GmbH offers an improved Jumbo print unit to be placed after e.g a Box King. Printing width max 2600 mm, printing height max 2500 mm. Max. 4 different stereos on the circumference..

Maybe you need an inexpensive high grade offline print unit before the flat bed Die Cutter?

At Wolff Karton in Germany there is a 2 colour Eurostar 1224 flexo printer with lead edge feeder and vacuum transport in front of an IMG-Klett Cobra 120 x162. Perfect for eg Coated F-flute or even single wall material. After the machines there is an automatic bundle breaker.

The Cobra flat bed die cutter can be had with stream feeder (Top feeder) or with lead edge feeder. Chase loader and pre make ready table. Universal stripping frame or dedicated stripping tools. Bundle delivery or directly onto pallets. Two of them in Scandinavia.

Make a safe purchase when buying a Hand Platen. IMG-Kletts Plator hand platen is available in sizes up to 2m and protects against injury with an active Laser security surveillance system. Low cost, but High tech. References in Scandinavia.

Please feel free to contact us for additional information or ask for a video showing the latest of the greatest.

We also buy and sell second hand machines.
